

Paris 2024 Olympics Games Smart Athlete Transportation System

3DEXPERIENCE®

About the presenter

Gauthier Fanmuy

Systems Engineering Portfolio Director

Aerospace

Automotive

Welcome to Paris Olympic Games 2024

System of Systems

Integration of a finite number of constituent systems which are independent and operatable, and which are networked together for a period of time to achieve a certain higher goal.

Value network collaboration

Smart, Safe & Connected

Mobility Systems Architecture

Modeling & Simulation Navigation & Execution

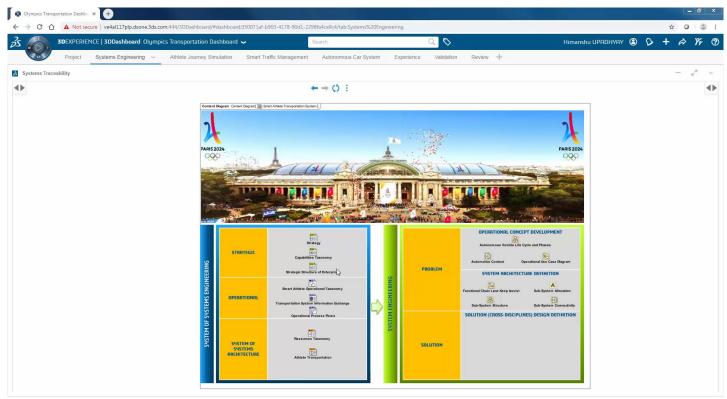

Mobility services stakeholders

Demonstration

Conclusion: benefits

- ► Understand the **operational** landscape
- ► Make decisions on candidate SoS configurations compliant with the capability requirements
 - ▶ Automatically verify capability requirements based on emergent SoS behavior
- ► Develop **standard-based** system of systems architecture to simplify source selection all along the **supply chain**
- ► Deliver **consistent and complete** architectural specification for Systems acquisition

The future of SoS is immersive mission analysis
